Art Unit: 1644

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 drawn to a method of making a transfer factor, classified in class 530, subclass 412.
 - II. Claims 10-18, drawn to a transfer factor, classified in class 530, subclass 853.
 - III. Claims 19 and 20, drawn to a method of treatment, classified in class 514, subclass 2.
2. The inventions are distinct, each from the other because of the following reasons.
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the claimed factor could be made by recombinant methods.
4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the claimed invention could be used in in vitro assays..
5. Inventions I and III are different methods which use different ingredients to achieve different goals. Invention I is a method of producing a transfer factor, while invention III is drawn to a method of in vivo treatment. These methods use different ingredients and process steps to achieve different goals. Therefore they are novel and unobvious in view of each other and are patentably distinct.
6. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-III is not required for any other group from Groups I-III and Groups I-III have acquired a separate status in the art as shown by

Art Unit: 1644

their different classification and divergent subject matter, restriction for examination purposes as indicated is proper. Therefore they are novel and unobvious in view of each other and are patentably distinct.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Dr. Ron Schwadron whose telephone number is (703) 308-4680. The examiner can normally be reached Monday through Thursday from 7:30 to 6:00. A message may be left on the examiners voice mail service. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.
